DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 23-25, 27 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bacich (USPN 4733945). Bacich teaches an optical holding device having an outer member (Figure 17, element 180), an inner member (Figure 17, element 175) communicated with an outer edge portion of an optical element (Figure 17, element 185) and a drive element provided with the outer member ((Figure 17, element 184) as claimed in independent claims 1 and 29. Bacich also teaches an optical holding device using the mounts as discussed above for use in a multiple lens mounting system (column 3, lines 61-65) wherein the outer member of the mount holds a second optical element (Figure 1, element 86) as claimed in dependent claim 2, a return mechanism (Figure 17, element 184) as claimed in dependent claim 23, means to connect a secondary outer portion to the outer edge portion of the first optical holder (Figure 1, elements 10, 11 and 12) as claimed in dependent claim 24, the outer ring having a cylindrical wall having an opening wherein the actuator is located in the opening (Figure 17) as claimed in dependent claim 25 and wherein the outer ring has two ends with at least one of the ends providing for a

mounting portion (Figure 17) as claimed in dependent claim 27. However, Baciach fails to teach a drive mechanism as claimed in independent claims 1 and 29. It would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the mechanical drive element of Baciach with the actuator of the instant invention, since it has been held that broadly providing a mechanical or automatic means to replace manual activity which has accomplished the same result involves only routine skill in the art. *In re Venner*, 120 USPQ 192.

Allowable Subject Matter

Claims 3-22, 26 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in dependent claim 3 the prior art fails to teach an integral measuring device to measure the movement of the optical element, in dependent claim 9 the prior art fails to teach a tangentially mounted actuator and in dependent claim 14, the prior art fails to teach the mechanical configuration of the connection between the actuator, the outer member and the inner member.

Claims 30-35 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the reasons as set forth in the Office Action mailed March 3, 2003.

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 23-25, 27 and 29 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
